Source Code:

```java
import java.io.FileReader;
import java.io.FileWriter;
import java.io.IOException;

public class fileHandling
{
        public static void main(String args[]) throws IOException
        {
                int ch;
                FileReader fr = new FileReader("Sample.txt");
                FileWriter fw = new FileWriter("NewSample.txt");
                while ((ch = fr.read())!=-1)
                {
                        System.out.print((char)ch);
                        fw.write((char)ch);
                }
                fr.close();
                fw.close();
        }
}
```

Output:

```
PS E:\Code\Java> cd "e:\Code\Java\" ; if ($?) { javac fileHandling.java } ; if ($?) { java fileHandling }
The quick brown fox jumps over the lazy dog. The fox is known for its cunning and
intelligence, while the dog is known for its laziness and lack of motivation. Despite their
differences, the two animals are often seen together, possibly because they complement
each other in some way.

This passage describes a common scene involving a fox and a dog, using adjectives to
describe the characteristics of each animal. It also suggests that the two animals have a
relationship, even though they have distinct personalities.
